Full Stack Developer (Back End strong) with a passion for developing the complete flow of web applications and implementing good practices. Strong React and Node.js skills, in addition to an affinity with Model-View-Controller (MVC), Model-View-Template (MVT), and Service Oriented Architecture (SOA) architectures in Back End.

PROFESSIONAL EXPERIENCE

Full Stack Developer, VIRGEN DE CHAPI

Led the Back End team in developing two APIs (both implement the REST communication pattern) of an inventory management system with Django, Django REST Framework, and PostgreSQL, and e-commerce with Node.js, Express.js, and MongoDB.

April 2022 –
December 2022
Arequipa, Peru

Key accomplishments:

- Analyzed functional requirements and distributed tasks among developers, and sprints.
- Abstracted the entities that interact in the system from the requirements, and from there I developed the Entity Relationship Diagram (ERD), which was then discussed with the developers, reaching a unanimous agreement.
- As I presented Front End development experience; I supported the integration with the Back End API at each sprint, implementing Angular, Angular Material, and Bootstrap at each project.

PROJECTS

drugstore-app, A Full Stack application

Developed e-commerce that implements the Service Oriented Architecture (SOA), and solid user authentication through email validation that implements Stripe's payment gateway with Node.js and Express.js, and was presented to the International Congress of the Professional School of Systems Engineering (CIEPIS) contest.

- Stack used:
 - Front End: Angular, Angular Material, Bootstrap.
 - Back End: Node.js, Express.js, MongoDB, Mongoose, Passport, Nodemailer, Handlebars, Multer, Stripe.
 - Worked with Google Cloud Services (Cloud Storage and App Engine).
